Objective:

A tech enthusiastic person and front-end developer, I want to establish myself as an outstanding performer and want to work in a competitive environment on challenging assignments for influencing others to work perfectly.

Technical Skills:

Expertise: React JS, JavaScript, ES6, Bootstrap, Material UI, React router & hooks, HTML5, CSS3, Rest API, Next JS.

Comfortable: Node JS, Express JS, Mongo DB, Firebase, React Native, Tawilnd,

Familiar: Redux, Typescript, Webpack,

Tools: Git, GitHub, Heroku, Netlify, Nodemon, Jira

Projects:

Large scale team projects:

E-Sheba - MERN project ([Live](#) || [Client GitHub](#) || [Server GitHub](#))

E-Sheba is a service-based E-Commerce website where we implemented so many necessary services based on customer needs. We implemented three user's admin, service providers, service takers. I worked as a team leader and also a developer on this project.

My contribution:

- Have Implemented google Maps in the UI.
- Have Implemented a login page with firebase and custom login.
- Have gained mass knowledge about GitHub.
- Helped backend developer for further development.
- Have implemented a contact and subscribe section.

Used-Technologies:

React JS, firebase authentication, react-router, private-route, react-hook, bootstrap, MongoDB, Node JS, react-bootstrap, express, Heroku, and hosted in firebase.

Personal projects:

ClothStore - E-commerce – Full-Stack ([Live](#) || [GitHub](#))

On this website, customers can order products and can see their order conditions on the dashboard.

- Customers can order products and can pay and see their order also.
- Have Implemented a login page and custom login with firebase.
- Have Implemented admin & user dashboard and customers can give reviews.
- Animated & Responsive also.

Used-Technologies:

React JS, firebase authentication, react-router, private-route, react-hook, bootstrap, MongoDB, node js, react-bootstrap, express, Heroku, and hosted in firebase.

Retro Blog (Blog site) – Full Stack([Live](#) | | [GitHub](#))

On this Blog website, customers can read blogs and after paying read paid blogs.

- Viewers can read blogs and can pay and read the premium blogs.
- Have Implemented a login page and custom login with firebase.
- Have Implemented admin & user dashboard.
- Animated & Responsive also.

Used-Technologies: React JS, firebase authentication, react-router, privet-router, bootstrap, and hosted in firebase, MongoDB, Node JS, Express JS, Heroku.

Auto-Repair – Full-Stack ([Live](#) | | [GitHub](#))

On this website, customers can book and buy car problems and cars parts and also can contact with the specialists and customer can see their order condition in dashboard.

- Customers can book a service online and can pay and see their order also.
- Have Implemented a login page with firebase.
- Have Implemented admin & user dashboard.

Used-Technologies:

React JS, firebase authentication, react-router, private-route, react-hook, bootstrap, MongoDB, node, express, Heroku, and hosted in firebase.

Education and Language Proficiency:

Bachelor of Art's (2019 -
2024)
Rangamati Govt. College
